Thorium: Crustal abundance, joint production, and economic availability

. North America is the largest producer with 37% of the global capacity. In Diffusion Processes in Nuclear Materials Ed.

Economic Evaluation of Thorium Oxide Production from Monazite using Alkaline Fusion Method

A study of such micro-heterogeneous fuel designs for pressurized water reactors PWRs, where the spatial separation of the uranium and thorium is on the order of a few centimeters was supported by a DOE—NERI.

The Evolution of CANDU Fuel Cycles and Their Potential Contribution to World Peace

Given the projected 100+ year mine life, Round Top has the unique potential to serve as a reliable long-term partner to both the U. Nonetheless, the overall trend is evidently maintained; under equivalent operating conditions, fission-product segregation and release tend to be lower for ThO2 than for UO2 fuels. The thorium-HEU fuel was circulated in solution with continuous reprocessing outside the core to remove fission products,
