## The 10 Animals In Danger Of Extinction In The World

The female tigers are around 200 kilograms. And there is no known antidote. Unfortunately, the cane toad excretes bufotenin in very small amounts and other toxins in relatively large quantities, which is why toad licking sometimes results in serious illness, or even death.

## Risks to Wildlife from People

Many victims have been known to go into shock and drown or die of heart failure before ever reaching the shore.

## The Most Dangerous Animals Found In North Carolina

Wildlife that get used to being around people and developed areas such as picnic areas and campgrounds also are at greater risk of eating human food and catching diseases from people and pets or giving diseases to humans and their pets.

#### **Animals in Danger of Extinction**

Another international agreement attempts to regulate the hunting of whales.

#### 10 Terrifying Things In Arkansas That Might Just Kill You

Known as bycatch, this is a serious threat to hawksbills turtles.

## Top 10 animals in danger of extinction

The wealthier nations have taken a lot and the time has now come to give. Each year humans use 1.
