Spectacled bears in the wild It is important to educate the public about these peculiar bears. The male is often larger and heavier than the female bear. Spectacled bears are more herbivorous than most other bears; normally about 5 to 7% of their diets is meat.

Spectacled Bear — kidcyber

They live mainly in the lush high altitude forests clothing the slopes of the Andes Mountains climbing as high as 14,000 feet 4,300 metres. South America's largest mammal is the Panthera onca. However, Bond originally imagined Paddington to have 'travelled all the way from darkest Africa', before being advised that there were no bear species in Africa! With one of the most vegetarian diets of their species, they likely play a role in seed dispersal within their ecosystem.
