This program installs via a DOS program which comes on a diskette. Pick is then set to T and the while expression stops running.

MTEXT abc string

I have updated my program to Version 1.

The Abcs of Workflow for E Business Suite Release 11i and Release 12

Various have also been updated to reflect the renamed function names and earlier modifications to the function. As the new name suggests, I have now lifted the single drawing restriction, with the updated version allowing the user to copy a selection of objects to an entire set of drawings, without opening each drawing in the AutoCAD Editor.

Residual Value of Release 12 C3

This updated version includes an additional command, c2wipe, which enables the user to convert a selection of circles to circular wipeouts.

new realease in computer

When writing your program, consideration should be made as to how the program will act under various conditions. To those who have contacted me directly, please know that I have received your messages, but finding the time to adequately respond to everyone in a timely manner is becoming increasingly difficult - for this I apologise.

AutoCAD R12 and DOS

The first group establishes several variables. The Unformat String function will remove all MText formatting codes from a supplied string. The updated version fixes a bug causing the program to return an error if an object intersected the bounding box of the block at only one point.
