We will see more cases like this in the analyses presented in §3. Our answer comes from the fact that phonological grammars are learned.

The crossing constraint and 'backwards languages'

Somerville, MA: Cascadilla Proceedings Project. In §3 we use this framework in analyses of several types of tone processes, including bounded and unbounded tone shift and tone spread in §3.

Strict Locality and Phonological Maps

Talk handout, Linguistic Society of America, Chicago.

The crossing constraint and 'backwards languages'

Forming a compound and spelling it out.

Strict Locality and Phonological Maps

ARs consist of two strings one of tones and one of TBUs , each with their own predecessor and successor functions.
