### THE BACKGROUND, CONTEXT, AND SCOPE OF THIS REPORT

Drawing upon specific examples from your data, your plan should describe, analyze, and interrelate your selected issues. If you are using separate queries, are you pulling the contribution ID for the ytd2 query? I was attending a session by my good friend. For example my report data is as follows: Name Age Salary Adam 25 2500 And if I add any other dimension which has more than one value then the salary gets repeated.

### Removing the Confusion from Calculation Contexts

Note that this can be used to enter dates values too.

### Contextual Analysis Plan & Report

I would like to use the filters in the where so I can calculate the increase pct between each year. Name the Alerter, Below Average.

### Removing the Confusion from Calculation Contexts

With the report creation book, apparently you can access a web site that contains the sample data from the eFashion universe and work through some exercises. I generally use combination of foreach and In operater, or forall and In operater. I think I am going to try it! So we came out with a simple solution that could help webi users in many other situations.
